

# Pilotage plan

For the close-quarters bit a chart plotter should not do for you: draw the harbour, name the marks, and write the bearings down before you need them.

HARBOUR

DATE

TIDAL HEIGHT AT ETA

BOAT DRAUGHT

MIN DEPTH NEEDED

ENTRY / EXIT

## PILOTAGE LEGS

Leg	Transit / leading marks	Course °T	Clearing bearing	Depth	Notes

## HARBOUR SKETCH

Marks, transits, dangers and your track — not to scale.

## CONTINGENCY / ABORT PLAN
